

GREAT FLYING IN A GREAT COMMUNITY

Canandaigua Airport (IUA) is a vital part of our region — supporting recreational flying, business travel, training, and emergency flights. We are fortunate to be surrounded by a wonderful community, including the City of Canandaigua, and we appreciate your help in minimizing noise, especially during departures over the City and during early-morning, late-evening, and other off-hours operations.

*Consider the Community
as You Depart.*

Canandaigua Lake and City of Canandaigua

SPECIAL ATTENTION:

DEPARTURES OVER THE CITY OF CANANDAIGUA

Runway 13 departures typically overfly or pass near the City of Canandaigua. When practical, please take steps to minimize noise and gain altitude efficiently while remaining within safe operating procedures.

GAIN ALTITUDE PROMPTLY

After takeoff, climb to a safe altitude as quickly as practical using appropriate procedures, with particular consideration when departing Runway 13 toward the City.

MINIMIZE ENGINE NOISE

Avoid unnecessary engine operation at the airport, including prolonged run-ups, repetitive power checks, and high-power ground operations, especially during noise-sensitive hours.

BE CONSIDERATE DURING OFF-HOURS

Early-morning, late-evening, and other off-hours operations can have a greater impact on nearby residents. Please minimize noise when practical.

LIMIT REPETITIVE PATTERN OPERATIONS

When practical, avoid extended touch-and-go operations, especially during early-morning and late-evening hours.

RESPECT OUR NEIGHBORS

Our airport is close to residential areas, including the City of Canandaigua. Help us remain a valued member of the community by avoiding unnecessary low-altitude flight over neighborhoods when practical.

*Fly Safe.
Fly Friendly.
Keep IUA Strong.*

Thank you for your consideration and for helping Canandaigua Airport remain a great place to fly and a valued part of our community.
